PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience building scalable SaaS and real-time systems using Next.js, Node.js, and MongoDB. Experienced in developing RFID-based real-time tracking systems deployed in enterprise environments (including Maruti Suzuki) and integrating payment gateways (Razorpay, PayPal, PhonePe, SenangPay) with subscription billing. Proven track record of improving system performance, scalability, and user experience across production applications.

TECHNICAL SKILLS

Frontend Next.js, React.js, Redux, Material UI, HTML, CSS, JavaScript	**Backend** Node.js, Express.js, GraphQL, Apollo Client
Database MongoDB, MariaDB	**Payments** Razorpay, PayPal, PhonePe, SenangPay, Subscription Systems
Cloud & DevOps AWS, Google Cloud, Azure (Basics), Nginx	**Specialized** RFID Systems, Real-Time Data Processing, SaaS Architecture
Tools Git, REST APIs, Postman	**Languages** Marathi (Native), Hindi (Intermediate), English (Intermediate)

WORK EXPERIENCE

Full Stack Developer

Kritrima Prajna Solutions Pvt. Ltd., Mumbai

May 2023 – Present

- Developed and scaled SaaS applications using Next.js, Node.js, Express, MongoDB serving 1,000+ users
- Designed and implemented REST APIs handling high-volume transactional workflows
- Integrated payment gateways (Razorpay, PayPal, PhonePe, SenangPay) supporting subscription-based billing and recurring payments
- Built automated invoicing system with cron-based reminders, improving payment collection efficiency
- Optimized backend performance and database queries, reducing API response time by 30–40%
- Deployed and maintained applications on AWS & Google Cloud, configuring Nginx servers

- Worked with Azure (basics) and improved understanding of multi-cloud environments

Software Development Engineer
Big Pluto Technologies Pvt. Ltd., Gurgaon
Dec 2022 – May 2023

- Contributed to Lighthouse – RFID-based real-time tracking system processing continuous real-time data streams
- Built features for real-time asset and user tracking using RFID technology
- Worked on enterprise system deployed in Maruti Suzuki India, ensuring reliability and scalability
- Developed frontend using React.js, Redux, Material UI
- Built backend services using Node.js, Express.js for real-time data handling
- Implemented GraphQL & Apollo Client, improving data fetching efficiency
- Designed optimized MongoDB schemas for high-frequency read/write operations

KEY PROJECTS

eduCOBOT – EdTech SaaS Platform

- Built gamified learning platform using Next.js, Node.js, MongoDB
- Implemented student progress tracking, assessments, and dashboards for hundreds of active users
- Developed interactive Blockly-based coding system
- Optimized backend APIs for performance and scalability

Invoice & Subscription Management System

- Developed invoicing system with GST, installments, and recurring billing
- Integrated Razorpay, PayPal, PhonePe, SenangPay for payments and subscriptions
- Built automated billing cycles and cron-based reminders, improving payment tracking efficiency
- Implemented PDF invoice generation and backend scheduling

Interactive Blockly Learning System

- Built visual coding platform using Blockly + React
- Developed guided tutorials with validation logic and gamified progression
- Implemented real-time feedback system for enhanced learning experience

EDUCATION

MBA – Human Resources Management Yashwantrao Chavan Open University, Nashik	*2021*
Bachelor of Computer Applications (BCA) Raje Ramrao Mahavidyalaya, Jath	*2018*
